

3 kV ACRYLIC GLASS SLEEVING

DESCRIPTION

This is the most commonly used fiberglass sleeving for insulation purposes, having good electrical and mechanical properties.

APPLICATIONS

- Wire harnessing
- Electrical insulation
- Motor insulation

PROPERTIES

- Operating Temperature: - 25°C to +155°C
- Thermal Class : F
- Dielectric Strength : 3 kV

CHARACTERISTICS

- Flexible
- Good mechanical strength
- Good dielectric strength
- Good temperature resistance

AVAILABILITY

In bore sizes from 0.5mm to 16mm in a broad range of colours.

APPROVALS

Passes UL 1441 flame test in horizontal position.
