# A D H E S I V E T A P E S

All of our adhesive tapes are available with three different adhesive systems: rubber thermosetting, acrylic and silicone bases, and in a number of different tack strengths.

All substrates are available in a number of thicknesses and, in many cases, a variety of colours. Substrates available include paper, cotton, polyester, glass, Nomex<sup>®</sup> and Kapton<sup>®</sup>.

We are also able to offer most tapes as converted piece parts such as washers, masking dots and quick release pads and are also able to slit the majority of tapes to any width required.
