

GLASS REINFORCED POLYESTER ADHESIVE TAPE

DESCRIPTION

This tape is for use in locations where both temperature and high mechanical strength are required. The material has high impact and tensile strength in both directions.

APPLICATIONS

- Electrical insulation
- Outer wrap
- Wire harnessing

PROPERTIES

- Operating Temperature: 130°C
- Thermal Class : B
- Dielectric Strength : 5 kV
- Tensile Strength : 200 N/cm
- Adhesion stretch : 4.5 N/cm

CHARACTERISTICS

- Good temperature resistance
- High tensile strength
- Thermosetting

AVAILABILITY

In any width, although colour is limited to natural (clear).
