

# DOUBLE SIDED TAPES

---

## DESCRIPTION

These tapes have a wide range of uses and we offer various substrates including paper, polyester and foam.

## APPLICATIONS

- Fixing
- Sealing
- Noise and vibration damping
- Positioning of components
- Interlayer

## PROPERTIES

Various properties are available with operating temperatures up to 180 °C. Various combinations of electrical and mechanical properties can be achieved, including different adhesive tack strengths.

## CHARACTERISTICS

- Highly conformable
- Good dielectric strengths
- Good temperature resistance
- Easy to use

## AVAILABILITY

We have a large range of these tapes and can offer them in a number of different forms from standard double sided tapes with release liner to pads and tagged tapes which eases handling of these items. Available in any width.
