

ADHESIVE POLYFLEECE TAPE

DESCRIPTION

This is a composite material designed to offer good mechanical and dielectric strength, together with puncture and abrasion resistance and the ability to absorb varnishes and resins.

APPLICATIONS

- Electrical insulation
- Phase insulation
- Outer wraps
- Hold down

PROPERTIES

- Operating Temperature: 130°C
- Thermal Class : B
- Dielectric Strength : 4.8 kV
- Tensile Strength : 55 N/cm
- Adhesion to steel : 3.6 N/cm

CHARACTERISTICS

- Good puncture resistance
- High dielectric strength
- Good mechanical strength

AVAILABILITY

In any width, and is particularly useful for margin tapes in smaller widths due to its strength and thickness. Colour is natural (cream).
