

WOVEN GLASS FIBRE TAPE

DESCRIPTION

This material is used for high temperature applications, mainly in the rotating machine industry.

APPLICATIONS

- Coil wrapping
- Rotating machines

PROPERTIES

- Operating Temperature: 400°C+
- Thermal Class : C
- Breaking Strength : 450 kg

CHARACTERISTICS

- High temperature resistance
- High tensile strength
- Good support of impregnation systems

AVAILABILITY

Available in standard sizes of 6, 12, 19, 25, 38 and 50mm and in four different thicknesses. Natural (white) colour.
