

TYING TAPE

DESCRIPTION

Tying tapes are made from a special stabilized synthetic rayon, treated to produce a high tensile strength. These continuous fibres are particularly suitable for wrapping around tight corners.

APPLICATIONS

- Lacing
- Electric motors
- Transformers
- Bundling

PROPERTIES

- Operating Temperature: 130°C
- Thermal Class : B
- Tensile Strength : 4 kg per fibre

CHARACTERISTICS

- Flexible
- Easy to use
- Economical
- Good tensile strength

AVAILABILITY

Available from 4 strands to 22 strands.
