

POLYGLAS BANDING TAPE

DESCRIPTION

Banding tapes consist of parallel twisted glass yarn pre-impregnated with special thermosetting polyester resin. This gives a very strong tape that acts as an excellent insulator as well as a strong bond.

APPLICATIONS

- Banding of motors
- Bracing tape for coils
- Blocking transformer columns

PROPERTIES

- Operating Temperature: up to 200°C
- Thermal Class : F to H
- Dielectric Strength : 12 kV/mm
- Tensile Strength : 2500 N/cm

CHARACTERISTICS

- Strong
- Easy to use
- Good dielectric properties

AVAILABILITY

As a Class F or Class H tape in widths of 10mm, 15mm, 20mm, 25mm or 30mm.
