

# COPPER SCREENING TAPE

---

## DESCRIPTION

These are specially formulated shielding tapes comprising of polyester/copper combinations and are suitable for electro-magnetic shielding.

## APPLICATIONS

- Toroidal transformers
- Electro-magnetic screening
- Induction loops

## PROPERTIES

- Operating Temperature: 130°C
- Thermal Class : B
- Dielectric Strength (polyester) : 200 kV/mm

## CHARACTERISTICS

- High dielectric strength
- Conformable

## AVAILABILITY

This material is available in a large array of configurations for both copper and polyester. Thicknesses and widths can be varied to suit and the material can be supplied in a full laminate, a fringed laminate, fully enveloped, or with a solder gap.

## APPROVALS

UL recognized for many of the varieties.
