

PRESSPAPER AND PRESSBOARDS

DESCRIPTION

This is a range of high quality electrical presspapers and pressboards in several different grades ranging from 100% Kraft to pure cottons, for many different uses.

APPLICATIONS

- Interlayer insulation
- Outer wraps
- Lead exit protection
- Layer end packing
- Oil immersed transformers

PROPERTIES

- Tensile Strength : 70-90 N/mm²
- Electric Strength : 10-14 kV/mm

CHARACTERISTICS

- Flexible in thinner sections
- Conforms well to uneven surfaces
- Easy to shape and form

AVAILABILITY

In several different grades, varying in colour from buff to blue, in thicknesses of 0.10mm to 3mm. Also available in tube and rod form.
