

VULCANIZED FIBRE

DESCRIPTION

This material has extremely high internal bond strength and mechanically is excellent in punching, forming and machining applications.

APPLICATIONS

- Washers
- Spacers
- Gaskets
- Insulation slot wedges
- Cable clamps

PROPERTIES

- Operating Temperature: 105°C
- Thermal Class : A
- Electrical Strength : 6.9 kV/mm
- Tensile Strength : 9.5 kgf/mm²

CHARACTERISTICS

- High mechanical strength
- Good dielectric properties
- Good wear resistance
- Good resistance to solvents

AVAILABILITY

Available in grey, red or black, in thicknesses from 0.8mm to 12.7mm.
